## Trustees Meet

The Board of Trustees of the Chinook Consolidated S. D. No. 16, met in the school on Saturday evening, April 6th, the following Trustees being present: Messrs. McDonald, McLean, Hille and Rosenau.

The minutes of the last meeting were read and on motion by Rosenau, were adopted as read. The correspondence was then dealt with.

The Board decided to allow Mr. Sam Machell \$1.00 per day for conveying his children to the Cereal School during last year, 101 days in all.

The following accounts were approved and on motion of McDonald, were ordered to be paid.

New Walker Mine coal	72.50
Jas. L. Carter frt on coal & phone	45.50
M. L. Chapman, draying	30.65
F. L. Bassett, coal	11.10
Western Mun News supplies	13.40
Hurley's, on account	8.80
C. C. Snowdon, oils, soaps	20.00
E. E. Jacques, on account	14.10
Workmen's Com. Bd.	1.90
Levi Vennard, van driving	43.67
R. D. Vanhook, frt, on coal	46.25
Thos. Gilbertson, work on van	6.20
New Walker Mine, coal	74.34
E. E. Jacques, on account	12.80
Adadia Produce,	1.20
Levi Vennard, van driving	60.00
Workmans Comp. Bd.	5.00
Service Garage, on account	80.80
Robinson Bros.,	81.60
E. E. Jacques,	12.45
W. E. Bennett, conveying of children	62.00
R. D. Vanhook, draying	31.20

The resignation was received

(Continued on page 8)

## Cloverleaf U.F.A.

A meeting of the Cloverleaf U. F. A. was held at the Peyton School on April 11th with a good attendance. Mr. Rideout addressed the meeting in regard to the municipal hospital scheme, speaking in favor of a cottage hospital in Chinook in connection with the central Hospital in Youngstown. Lorne Proudfoot, M. L. A., spoke on the work accomplished in the past session of Legislature, touching on long term loans, old age pensions, sale of government-owned railways and the return of the natural resources. Several questions were asked the speakers and the meeting closed with a vote of thanks to both gentlemen for their addresses.

The next meeting will be held at the call of the President in the Collingholme School.

## Railway Grading Contracts Placed

The letting of grading contracts for four Canadian Pacific railway branch lines on the prairies, totalling a distance of 99 miles, was announced recently at Winnipeg, the award in all cases going to a western Canadian firm.

The longest stretch is 41 miles southwesterly from Coronation to Youngstown, which, together with a 25-mile line northwesterly from Acme, was let to Fred Mannix, Calgary.

Work will commence as soon as weather conditions permit.

Other branch line contracts will be let later in the season, it is understood.

## Women's Institute and Dance Was A Huge Success

The concert and dance which was put on by the Women's Institute on April 12th, was a huge success. Mrs. E. E. Jacques, President, acted as chairwoman.

First on the program was a tableaux, "Camp Fire," by High School students. Mrs. Nelson gave two characteristic recitations, which was much appreciated by all present. Norman Jacques sang solos and Lorne Rideout and Norman Jacques, and a duet. There were two groups of Swedish Folk dancers, comprised of a number of small girls. They did remarkably well and showed that they had been thoroughly trained. Mrs. J. C. Turple played two piano solos, which were of high class and was much appreciated.

A sketch entitled "A Fit for Every Circumstance," was given by a number of ladies who are members of the Institute, which was very much enjoyed by all.

Mrs. O. Nelson, who devoted so much of her time to the training for the Folk Dances and the sketch, was presented with a beautiful bouquet of flowers by little Freda Milligan. Proceeds amounted to \$175.00, which will be spent for the benefit of the town.

## Results of Easter Examination

The following are the results of the High School Examinations of the Chinook School, which were held just before Easter. Individual reports are being issued for each student.

### Grade IX.

Elsie Smith	74.0
Gladys Wright	73.5
Annie Sharp	71.5
Thompson McPherson	59.3
Roy Trogen	52.5
Beulah Vennard	49.0
Sidney Demare	42.2
Mabel Young	40.8

### Grade X.

Doris Marcy	85.4
Vincent Rideout	77.5
Dorothy Carter	68.2
Madeline Otto	58.8
Eric White	55.0
Alexandra McPherson	49.7
Alfred Deman	49.0
Mildred Milligan	40.0

### Grade XI.

William Thompson	81.5
Ida Marcy	78.6
Lyle Begon	78.4
Harry Thorpe	76.7
Sadie McLean	72.5
Muriel McIntosh	67.5
Verna Dressel	66.6
Catherine Ferguson	62.1
Mary Greene	60.6
Marvel Milligan	54.7
Dorothy Neff	49.9

Not ranked—Gladys Stoness, Murdoch McPherson, Stuart Jones.

PART GRADES XI, AND XII.

Ethel Young 85

Bleow 50 per cent is a failure. Below 60 per cent is unsatisfactory. Students making below 60 per cent must do more work in order to meet with success on their final examinations.

## C. G. I. T. Tea

The C. G. I. T. Group will serve tea in the church on Saturday, April 20th, from 3 to 7:30 p.m. The girls plan to have twelve tables, one for each month of the year. You are asked to sit at the table allotted to your birth month and to donate a cent for each year of your age.

Everybody come and help boost the funds of this worthy organization.

## Arbor Day, May 6

Monday, May 6th, has been named as Arbor Day by decision of the Provincial Government. On this day special attention will be paid throughout the Province to the planting of trees and flowers and the beautification of homes and grounds.

## Public Meeting

A meeting of the ratepayers of Bon S.D. will be held in the Consolidated School on Saturday afternoon, April 20th, 1929, at 2 o'clock, for the purpose of electing a trustee for the above district to take the place of Mr. Jas. L. Carter, who on account of ill-health, has been compelled to resign.

LORNE PROUDFOOT, Sec.

## LADIES' CARD CLUB

The Card Club met at the home of Mrs. W. S. Lee last Tuesday evening, the prize winner being Mrs. Bassett. The prize was a dainty hand-embroidered apron. The Club will meet at the home of Mrs. I. W. Deman next week.

## Think Of the Future

A condition of prosperity prevails throughout Canada from coast to coast. It is not confined to any one section nor to any one industry or group of industries. There is, in fact, a general tendency to the most favorable situation probably without a parallel in the past history of the Dominion. This is not to say that everybody or every industry is equally prosperous, or, indeed, that there are not those who do not enjoy prosperity. The contrary is true. But taking Canada as a whole, and in the major activities of its people, prosperity reigns today.

Such a condition is, of course, gratifying. Nobody would have it otherwise, and all desire that it should be long continued. But there are dangers to be avoided in times of more or less universal prosperity which do not present themselves when times are hard and business depression rather than business activity is in evidence. It is an old and often proved statement that many people who can and have stood strong and true through the strain and stress of adversity, and won through to ultimate victory, have cracked and broken when favored by prosperity and success.

Canada is prosperous today, and it should take full advantage of its present favorable position. The people are optimistic and should continue so. They should continue to show vision, courage, and engage in constructive development. They would be unworthy of their heritage and the future possibilities of their Dominion if they acted otherwise. But they should nevertheless have a care in the enthusiasm of the glowing present not to forget the years to come.

Just as night follows day, winter follows summer, youth grows into old age, and death is the ultimate ending of birth, so it is inevitable that, in course of time, depression in business will follow buoyancy. A pendulum swings just as far one way as it does the other. It is a wise man and a wise community, therefore, which when times are good and development is the order of the day, takes thought of, and prepares for that future day when retrenchment may become a necessity.

If growth and expansion is artificially pushed too far, if an individual or a community becomes committed to large future obligations in order to further speed up present development, they may find themselves in great future difficulty.

All countries, all communities, most individuals, have passed through such bitter experiences. Western Canada has not been immune from them, and those who recall the "boom" days of the past know that the period of adjustment following the collapse of a "boom" was much longer than the "boom" itself, and that in the final analysis the losses far out-weighted the gains.

At the present time all our Western cities, towns, villages and rural municipalities are planning their programmes for 1929. Times are prosperous, the country is growing, and the almost universal demand for increased expenditures to provide this and that. Today it is possible and comparatively easy to borrow the money to carry such enterprises through and to meet the initial interest charges. But a debt is created which will remain for years to come. When the present buoyancy subsides, when money is less easy to obtain, when depression and some degree of unemployment replaces present favorable conditions in business, will the load be too heavy to carry?

It will be unless care is exercised by all civic and municipal authorities in seeing that the safety line in expansion is not passed, and that expenditures now made are for permanent constructive work which will be revenue producing in the years to come. Extravagance in ideas is no more justified in times of prosperity than they are at other times. It is in those "other times" that the bills really have to be paid.

Developmental works are necessary and are justified in times of prosperity, when they would be suicidal, in fact quite impossible, in times of depression. When depression prevails it is frequently impossible to provide for even imperative and wholly justifiable expenditures. These must be provided when times are prosperous. It then becomes an equally imperative duty to provide them.

But non-essentials, no matter how desirable they may be in other respects, should be carefully considered less citizens, the taxpayers are unthinkingly swept into the authorization of expenditures which later on they may have cause to bitterly regret.

Such words of warning are unnecessary in times of depression; it is now, when prosperity is with us, that warnings are necessary and should be heeded.

## Prince Has Turned Author

Writes Foreword To Final Volume Of Merchant Navy

The Prince of Wales has turned author, or at least has written a foreword to the final volume of the Merchant Navy by Sir Archibald S. Hurd. The foreword was written in his capacity as Master of the Merchant Navy and fishing fleet, conferred upon him by the King last year.

Paying warm tribute to the British mercantile marine, the Prince refers to the thrill that he has always experienced in his world-wide travels at the sight of the red ensign. He refers to the work of the merchant marine in the world war as having provided the final test of a heroism unparalleled in history.

## A SPRING TONIC AN AID TO HEALTH

You Can Lay the Foundation Of Good Health Now By Building Up Your Blood and Strengthening Your Nerves Through the Use Of Dr. Williams' Pink Pills.

The good old fashion of taking a tonic in the Springtime, like most of the customs of our grandfathers, is based upon sound common sense and good medical practice. Winter is always a trying time for those who are not in rugged health. Many men, women and children go through the winter on reserve strength they have stored up during the sunny summer months, and grow increasingly pale and languid as the spring days approach. A tonic for the blood and nerves at this time will do much for such people, by putting color in the cheeks and bringing that tired feeling that worries thousands of people at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are frayed or shattered. You cannot compete with others if you do not get refreshing sleep at night, or if your appetite is poor or you are losing weight. You need a tonic at this time to add to your efficiency now, as well as to save you from suffering later on. And in all the realm of medicine, there is no safer or better tonic than Dr. Williams' Pink Pills. These pills tone and enrich the blood which circulates through every portion of the body, strengthening faded nerves and running down organs, and bringing a feeling of new strength and energy to weak, easily tired, despondent men, women and children.

Mrs. L. Hupman, Summerville, Centre, N.S., writes:—"Dr. Williams' Pink Pills have been of the greatest benefit to me. A few years ago I was in a badly run down condition. I became so weak and nervous that I could scarcely go about, and doing my housework left me completely used up. Everything seemed to worry me, and I was in a very discouraged condition when I began taking Dr. Williams' Pink Pills. I soon found the pills helping me, and continuing their use I felt revived and strong. Since then I always take a few boxes in the Spring to build me up for the hot weather, and always I find the best results. I therefore cheerfully recommend these pills as the best of health builders."

You can get these pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## The Newest Invention

Wrist Watch When Worn Three Hours Winds Itself

A self-winding watch has been invented by a Lancashire artisan. Finding that seventy-five per cent of watch troubles were caused by dirt or moisture entering through the aperture of the winder, he set out to make a watch which would be completely enclosed. In two and a half years, working in his spare time, he succeeded. The new wrist watch winds itself. To keep it going all the owner has to do is to wear it for three hours a day. It can not be overwound.

Lots of people make trouble and don't know what to do with it.

-they call him  
"The man you can't rattle"

Many successful business men regularly use Wrigley's. The act of chewing has a soothing effect. The healthful cleansing action of Wrigley's refreshes the mouth—gently stimulates the flow of the natural juices—relaxes the nerves—relieves digestion.

## Farmers Show Interest In Valuable New Book

"Field and Farmyard" Being Distributed Free To Farmers  
The new book "Field and Farmyard," which is being offered free to farmers by Imperial Oil Limited, has aroused a great deal of interest among farmers, and is creating for itself a great deal of favorable comment.

The book deals with practical farming problems covering different phases of cropping and cultivating, as well as livestock breeding, and has been judged by all classes of farmers in all sections of the country as a most authoritative work. In publishing the book, Imperial Oil Limited secured the services of a large number of outstanding authorities, and were fortunate enough to have these men, whose names are by-words in Canadian Agriculture, cover individually the subjects on which they are admittedly experts.

Dr. C. E. Saunders, producer of Marquis Wheat, is one of the noted authorities on grain growing and farming are incorporated in "Field and Farmyard." Other men whose reputations are familiar to most Canadian farmers, and who are contributors to the book are: W. L. Carlyle, manager of the E. P. Ranch, Alberta; Robt. M. Holtby, Ontario Fieldman for the Canadian Holstein Breeders' Association; Col. Bartley Bull, Hon. President of the Canadian Jersey Cattle Club; W. A. Dryden, chairman of National Livestock Records Board; Col. Robert McEwen, President of the Canadian Co-operative Wool Growers' Association; Thomas McMillan, M.P., one of Ontario's most famous farmers; Geo. B. Rothwell, Dominion Agricultural Extension Officer; Dr. Robt. E. Jenkins, Manager of the Donalda Farms, Alberta; J. D. McGregor, Lieut.-Governor of Manitoba and well-known Western farmer, and many others.

The general information contained in the book has been compiled and written by the Hon. Duncan Marshall, former Minister of Agriculture for the Province of Alberta. The book has been endorsed and recommended to farmers by Hon. W. R. McMillan, Minister of Agriculture, and Hon. John Martin, Minister of Agriculture for Ontario. Distribution of the book is now being carried out, and a large demand for copies indicates that in providing at no charge, a tremendous amount of valuable farming suggestions and information contained in it, Imperial Oil Limited has instituted a service well appreciated in the industrial history of Canada.

As a veritable effective preparation is Mother Grease, Vaseline Extremator and it can be given to the most delicate child without fear of injury to the constitution.

**Primitive Lights**  
Before the coming of the oil lamp lighthouses were lit by candles or coal fires. The last of the latter was the lighthouse at St. Bees, where a coal light burned until 1822.

## Keep Your Health TO-NIGHT TRY

**Minard's Liniment**  
for that cold and tired feeling.  
Get Well—Keep Well.

**KILL FLU**  
by using the OLD RELIABLE!  
Minard's Liniment Co., Ltd., Yarmouth, N.S.

A new German cruiser to be constructed at Kiel, is to be electrically welded, no rivets being used in any part of the ship.

Miller's Worm Powders destroy worms without injury to the child, and so effectively that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

"I wonder why they say 'Amen' and not 'Avomen' Bobby."  
"Because they sing hymns and not hers, stupid."

No one need endure the agony of cough with Holloway's Corn Remover at hand to remove them.

Gillett: "Did you ever kiss a girl when she wasn't looking?"  
Terry: "Not when she wasn't good-looking."

Use Minard's Liniment for the Flu.

## A "Tramp" Of the Skyways

New British "Plane Built To Carry Bulkier Articles

The bulkier articles can be transported across the world at a speed of 100 miles an hour in a new British aeroplane which has recently passed the fullest flying tests.

Its spacious cabin looks like a railway baggage van, for the machine has been built as a "tramp" of the skyways. It is known as the Vickers Belmore, and can be used as a freight-carrier, for the transport of troops or as a long-distance bomber.

The two Napier Lion engines have 1,000 horse-power, and with extra tanks to carry additional petrol the machine could remain in the air for between seventy and eighty hours.

Electricity supplies the lighting of this aerial pantachalon. The sides and roof are reinforced with wooden stays, and the floor, built up of wood in the manner of the Underground railway carriage, is similarly strengthened.

The Oil Of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

## Expenditures On Canadian Roads

In 1927 federal, provincial and municipal expenditures on the improvement and maintenance of Canadian roads amounted to \$45,750,000.

Asthma Cannot Last when the greatest of all asthma specifics is used. Dr. J. D. Kellogg's Asthma Remedy assuredly deserves this exalted title. It has to its credit thousands of cases which other preparations have failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma is needless when a remedy like this is so easily secured.

Prof.: "Can you give me an example of a paradox?"

Plebe: "A man walking a mile but only moving two feet."

## Simple Precautions Against FLU

### Sore Throat —

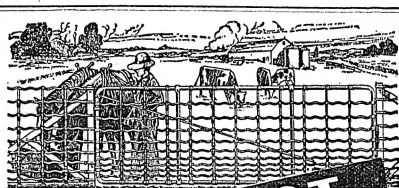

### — The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease-breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

You Actually save money on HEAVIER, STRONGER GATE.

**HOT GALVANIZED**

## Amazing Gate Value!

As long as you live your Frost Gate will positively defy strain and rust. The entire surface of the frame, the welded joints and fittings are HOT GALVANIZED by our own method used only in the Frost Factory. The fabric has the famous Frost Tight Lock. Heavier, stronger hinge bolts, clips and other super strength features. This sturdier, heavier gate costs less per pound of its weight. Investigate this astonishing value made possible by Frost methods and tremendous demand.

If there is no Frost dealer in your neighborhood, write to our nearest office.

CALGARY  
208 Sixth Ave., N.E.

## Farm Loans Soon Available

Ottawa Ready To Administer System To Canadian Farmers

Alberta and British Columbia lead the provinces of Canada in the move to take advantage of the long term loan system, given to farmers through the Canadian Farm Loan Board. In these two provinces provincial boards have been nominated by orders-in-council. This was announced by Dr. J. D. MacLean, commissioner of the Central Board, following the first meeting of that body since he returned from an organization tour of the west.

At the meeting, a statement given out by Dr. MacLean says, there was general discussion with respect to the progress of the work of the board, both at head office and where the branches are organizing. Machinery in Ottawa is complete for the administration of the long loan system to Canadian farmers. It remains only for the provinces to form their boards and for the federal and provincial bodies to deal with the applications for funds made to them. He expects loans to be made to farmers in the near future.

## Record Beet Acreage Predicted

All records for beet acreage in southern Alberta threaten to go by the boards in 1929. Pre-sign-up indications are that there will be over 10,000 acres of land planted to this crop if the spring outlook is at all satisfactory.

**ASPIRIN**  
Aspirin is a Trademark Registered in Canada  
W. N. U. 1751

# Every British Dominion Has An Independent Function In The League of Nations Body

One fact which has been made clear by the recent session of the League of Nations at Geneva is that Canada and every British Dominion has a definite and independent function in that body. Despite the conditions under which this country entered the League and the World Court, there still remains in the minds of some European statesmen the erroneous idea that Great Britain is the spokesman for the whole Empire.

Several episodes during the last session brought this subject to the fore, and in such a way, as to make the position of the Dominions abundantly clear. One of these had reference to the World Court, when exception was taken by several European delegates to a British Dominion being separately represented even if the question dealt with was of paramount importance to that Dominion.

Such a contention is absolutely contrary to the whole basis of Dominion inclusion in the League and the World Court and the British delegate, Sir Cecil Hurst, replied very forcibly with the statement that even if an English Judge was on the court, the Dominions would have the right of representation should it be dealing with a question which directly affected their interests.

Neither Canada nor any of the self-governing Dominions have ever recognized the right of Motherland delegates to vote or speak for them, and the sooner this is clearly understood by all member states of the League, the sooner will progress be made in matters affecting our interests.

Canadians are heart and soul behind the general idea and ideals for the maintenance of world peace of the League, but they will never be satisfied to take any position of inferiority in its councils, or relegate their vital interests to any one but their national representatives.

## Prospects Brighten In Maritime Section

### Betterment In the Economic Conditions Now Apparent

Since the first of the year, there has been an increase in car loadings for the Atlantic region of the Canadian National Railways of 3,100 cars over the same period last year. This forms a very good index as to the economic conditions of the Maritimes. Numerous large works have been undertaken including pulp and paper mills and additions to hydro-electric plants. The cold storage facilities at Halifax are rapidly nearing completion and they will bring Halifax in line with the most modern ports on the Atlantic seaboard. A cold and dry storage warehouse is also under construction at Moncton, and this should prove a very valuable addition to the facilities for the handling of products requiring this class of storage. Altogether the prospects look very bright for the continuance of the betterment in the economic condition of the Maritime provinces. Various mining developments are under way and there is considerable increase in capital investments both for new buildings and for additions to existing plants.

### Sure To Hear Of Them

Palpatingly, the infatuated young man sought counsel at the bazaar of an ancient and prayed that the ancient tell him how he might learn of his fair lady's faults.

"Go forth among her women friends," spoke the venerable one, "and praise her in their hearing."

"Is he mean?"

"Mean! He's so mean that if he were a ghost he wouldn't give you a fright."

"Why is baby's bed so high?"  
"My husband and I sleep soundly and that is to hear him if he falls out in the night."—Lustige Kolner Zeitung, Cologne.

W. N. U. 1781

## Spring Song

"What a fight that fellow gave!" And so on, into the night. This is one of several photographs published by the Tourist Department of the Canadian Pacific Railway to remind the unhappy angler that "Spring has come—and all the streams are o-open." Photographed near Lake Archambault, north of Montreal.

### Will Attract Hunters

#### Plenty Of Big Game To Be Found In Alaska

As a big game country, Alaska comes a close second to Africa, despite its lack of lion, elephant and rhino. Furthermore, it is likely to attract hunters longer than the latter terrain, for here is less annual "cleaning up" of a district.

What is even more important to the territory back of Anchorage and the Alaska railroad, are plenty of moose, caribou, mountain sheep and goat, and black and brown bear.

What is even more important to the ordinary hunter—it costs less to outfit for the Alaskan hinterland than to attempt Nairobi.

### Building Two Ways

The statement made at the convention of contractors held in Hamilton that material used in construction was now almost entirely of Canadian origin and manufacture was something to enthuse over. We build two ways when we build that way.

### A Hazardous Occupation

#### Natural Scientists Face Many Dangers In Tropical Jungles

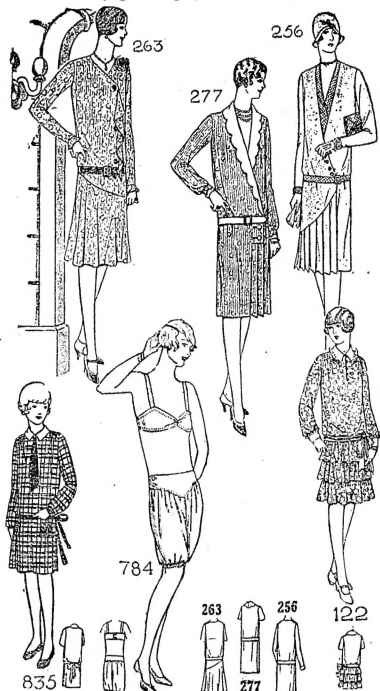

Pursuit of moths and butterflies in the tropical jungles of Ecuador is a hazardous occupation, according to W. Judson Coxey, member of the Philadelphia Academy of Natural Sciences, who returned from a protracted expedition.

Coxey told of meeting bird-eating spiders the size of dinner plates and killing venomous reptiles in the hands of rare and beautiful butterflies. One of the spiders encountered, Coxey said, he was forced to shoot with a revolver as it was about to spring at him.

Rattlesnakes which give no warning when attacking, were brought back by the scientist. They are known as "Eco" or "X" snakes because of their markings and have "rattles" which make no noise.

First Flapper—I say, your brother Dick can dance.  
Second Flapper—I know. Oxford's been the making of that boy.

# Work of Preserving Law and Order is Large Assignment in Our Vast Northern Empire

## RECEIVES NEW APPOINTMENT

R. D. PURDY

The Alberta Wheat Pool announces the appointment of R. D. Purdy as manager of Alberta Pool Elevators Limited, to succeed C. M. Hall, retired. Mr. Purdy has been manager of Alberta Wheat Pool Organization since January, 1925, and this change makes him manager of the subsidiary organization known as the Pool Elevators, as well. Alberta Pool Elevators operate more than 310 country elevators in Alberta, as well as three terminals on the Pacific coast. Mr. Purdy came to the Wheat Pool from the Bank of Montreal, he having been assistant manager of the Edmonton branch. He was born in Brighton, Ontario, and came West in 1905. He served twenty years with the banking business before coming to the Pool.

## Manitoba To Have

### Airplane Factory

#### Seven Acres Of Land In St. Boniface Sold For Site

An airplane manufacturing plant, heralded as the greatest industrial advancement in years, will be established in St. Boniface immediately. Announcement that the factory would be brought to St. Boniface was made by E. C. Mills, of Mills and Company, Winnipeg, following a special meeting of the Cathedral city council, when seven acres of land were sold for the site.

The plant, according to Mr. Mills, will be the Canadian branch of one of the largest aeroplane manufacturing concerns in the world, and it will be controlled entirely in Canada. The name of the parent company has not yet been divulged.

The seven-acre site of the new plant, which was sold with track-ledge, is known as the old Rat Portage Lumber Company's and old A. J. Lee Company's property, and is located between Tarte Avenue and the Norwood Bridge.

## Canada's North Is

### Real Beauty Land

#### Vivid Picture Of Charm Presented In R.C.M.P. Report

Canada's great Northwest is pictured, not as a region of solitude and waste, but as a land of beauty and attractiveness, in the report of the Royal Canadian Mounted Police, tabled in the House of Commons, East of the Great Slave Lake the scenic beauty is inspiring, according to Inspector Gagnon, who, describing a lengthy patrol to Fort Reliance says:

"The Hornby and Inconnu channels are the most beautiful routes possible; at every moment there is something to captivate attention, either in the abrupt shores or cliffs, or their varied coloration, or the thousand and one islands one encounters. Both channels are lined with innumerable pleasant little harbors.

"The waters are very clear and cold, and full of delicious trout."

### There's a Reason

The Egyptian government is planning a motor road over the route followed by the Israelites on their 40 years' journey to the Promised Land. But nothing is said as yet about drying up the Red Sea, says the Buffalo Courier-Express.

"What is it that lives in a barn, eats oats, walks on four legs, and can see as well from behind as from the front?"  
"Till hite. What is it?"  
"A blind horse."

Powder in guns for 40 years was found in good condition by University of Nevada.

Some years ago when our neighbors to the south betrayed an inclination to challenge Canada's right to her unoccupied Arctic hinterland, with particular reference to Ellesmere Island, the advisability of taking more active steps to prevent future trouble became apparent. That invaluable and highly efficient arm of the government, the Royal Canadian Mounted Police, offered a ready-to-hand solution of the problem and shortly afterwards the business of establishing more northerly outposts was undertaken seriously. It began in 1920 with the placing of a detachment at Port Burwell, near Cape Chidley, at the northeastern tip of the continental mainland, to assist the Customs Department to control the imported and outward bound Hudson's Bay trade. Since then police posts have been located on all the three great islands forming the western boundary of the lane of water west of Greenland. That lane is comprised of Davis Strait, Baffin Bay, Smith Sound, Kane Basin and Kennedy Channel, hitherto together furnishing the avenue of approach to the North Pole.

On Baffin Island, the southernmost of these boundary islands, three detachments of police are stationed—at Ponds Inlet, at the northern end; Pangnirtung, on Cumberland Gulf, and Lake Harbour, on the south, on Hudson Strait. On the central island, North Devon, is Dundas Harbour, and on Ellesmere Island, the northernmost, is a detachment at La Pêche Peninsula, on Kane Basin, in latitude 79.04 degrees north. In addition, constables have been lent to the Royal Canadian Air Force for service at its bases on Hudson Strait, whence it kept ice conditions continuously under observation last winter. From these various Arctic stations the whole northern archipelago has been and still is being controlled and administered. The police patrols have not hesitated to make very long journeys. For example, in the early part of 1927 the non-commissioned officer in charge of Bache Peninsula detachment crossed Ellesmere Island to visit the cluster of islands to the west—Axel Heiberg and others—some undiscovered territory until a quarter of a century ago. This patrol lasted fifty-four days and covered about 7,300 miles.

About the same time a non-commissioned officer in charge of the Pangnirtung detachment made a patrol of about the same distance, skirting the southeastern coast of Baffin Island and returning across the almost unknown interior. A constable, finding the body of a fur trader in his cabin on Baffin Island, hauled it out on his sled for 450 miles of difficult travel to Ponds Inlet for an inquest and Christian burial. The officers and non-commissioned officers in charge of mounted police detachments have commissions as customs collectors, postmasters, coroners, and magistrates. Bache Peninsula is believed to be the most northerly postoffice in the world. The Eskimos here have shown less disposition for violence than further west, but on one occasion, in 1920, a white man was killed by them near Cape Crawford, the northwestern tip of Baffin Island. The non-commissioned officer in charge at Ponds Inlet investigated, found the body, in his capacity as coroner held an inquest, arrested the accused, collected the witnesses and as magistrate committed the accused for trial. In 1923 a special court was sent from eastern Canada, which tried, convicted and sentenced those responsible for the homicide. There also have been cases of religious mania and homicidal insanity among these people. The relations between the police and the Eskimos are good.

When the Empress Dowager of China died, in 1908, her pearl neck-lace was buried with her. It contained nearly six thousand pearls and was valued at \$800,000.

"Look here, this new cream has made my shoes look like new."

"Um—er—suppose you swallowed some?"—Pages Gales, Yverdon.

# BEAUTIFY CANADA

## Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

### THE DRIVE TO FINISH OLD MAN DIRT IS ON

#### Greatest Effort in History of Canadian Cleanliness Includes Hundreds of Communities

The greatest effort in the history of Canadian cleanliness is on! Cleanliness has a history. It's influence can be traced down the ages. Those races that were clean were the races that were Masters.

The Athenians, with their baths and beautiful homes conquered the Persians, with their unkempt beards and dirty skins. The Romans, with their aqueducts, their barbers, their gardens beat back the barbarians with their goat skins and greasy fingers.

Louis the Fourteenth was the dirtiest monarch France ever had and one of her mightiest. Fifth kept the Panama Canal from being built years before it finally was. Bolshevism flourished when the dirty and the ignorant gained control in Russia—anarchy breeds in filth and squalor.

Cleanliness has always been po-

tent. Modern sanitation saved millions of lives in the great war. Real people, the wise, the leaders in progress, always have fought for cleanliness. At times it has been a sporadic fight, a skirmish. A clean man was handicapped by a neighbor who let his premises run wild. But co-operation has been brought to play at last.

This year, in Canada alone, hundreds of villages, towns and cities are campaigning for cleanliness, health, and beauty. They are not doing so for a day or a week but in a continuous campaign. There is a steady pressure.

Tin cans, flies, refuse, dirt, waste paper, unlighted buildings, unpainted surfaces are taboo. The drive is on. I won't be stopped.

Join the forward movement. Clean Up, Paint Up, and Keep It Up. Make the old enemies, Dirt and Disease and Unsanitary Advocate forever.

### The Use of Paint

#### Lessens Farmer's Cost Of Doing Business

The farmer, like the manufacturer, must employ the most efficient and economical methods of doing business if he is to prosper. When he keeps track of costs he finds that by building of better material, buying better implements, and then taking care of them, he increases his power of production and lessens the drain on his income.

Next to the purchase of good materials, the use of good paint is the farmer's best insurance; it protects his property and equipment against the rapid deterioration caused by wear and weather. The protection and appearance of barns, fences, windmills, wagons, tanks, etc., are just as important as the careful upkeep of factory tools and machinery, and depreciation here should be figured as carefully by the farmer as by the manufacturer.

A few cents invested in paint and a little work each season will soon show in the lengthened life of your equipment to say nothing of the satisfaction you will take in its improved appearance. Here is a list of paints that it will pay you to keep on hand:

Two-quart can of buggy paint in red and black, for painting up wagons and buggies.

A small can of aluminum paint, for interior iron work, such as stalls, stanchions, etc.

A small can of implement or spar varnish.

A half-gallon can of metal protective paint, for metal buildings. A good graphite paint is best for this purpose. Paint over regularly all such exposed metal parts as hinges, turnbuckles, outside hoops, door-hangers, iron hitching posts, etc.

A gallon can of barn color or house color for general repair work. It is well also to periodically treat the inside of staved silos with the special compounds prepared for that purpose.

The life of fence posts can be prolonged three times if the lower part is treated with the compound used on silo staves. This can be most easily done by taking a full barrel of the preservative, putting half in another empty barrel, taking the heads out of both barrels, and letting the fence posts stand in them over night. This treatment will make the poorest wood last longer than the best chestnut.

It has been proved that the painting of good galvanized wire fence doubles its life. In putting up a new

wooden wire fence the painting can be done very easily by making a shallow trough that will take in the roll of wire fencing. Turning the roll around in the trough and pouring the paint over it at the same time will thoroughly cover every part. A good metal paint is best for this purpose.

A paint which makes concrete sufficiently non-absorbent to shed an ordinary rain greatly enhances the life of concrete buildings for cow stables, granaries, dairies, etc. The absorption of water through the walls has been the principal objection to such buildings in the past. Concrete paints come both in natural cement color and in several pleasing shades.

It is never advisable to try to paint an old shingle roof unless it has been previously painted, because the water gets under the shingles causing them to rot and curl up. It is always well, however, in putting on a new shingle roof to dip the bundles into a properly prepared shingle stain; this is especially true now-a-days as the quality of shingles is much poorer than formerly.

It is good policy not only to prevent deterioration with paint but also to forestall paint troubles. The commonest of all paint troubles is peeling, the chief cause of which is moisture, and moisture in turn is due to:

1. Dampness in the Wood. This means not only wood which is damp to sight and touch, but wood improperly seasoned, recently exposed to rain or fog or dew.

The pores in kiln-dried lumber are open and will soak up moisture; for this reason allow a new building to stand a month or two unpainted.

In short, if there is moisture in wood, heat will drive it either out or in. If heat on the inside of the house drives it outward the paint will peel.

2. Dampness Back Of the Wood. This is commonly due to green plaster. Too often in a hurry to complete a house the painters are put to work on the outside while the plasterers are finishing the inside. To complete the rush, about the time the paint is dry the furnace is started to dry the plaster. The moisture mounds and an outlet and is driven out through the exterior woodwork, carrying the coat of paint with it.

3. Ochré Priming Coats. Common ochre is the cheapest pigment, and when one remembers that the priming coat is the foundation on which the finishing coat depends, he does not have to be a paint manufacturer or dealer to appreciate how absurd is the statement so often made, "Anything is good enough to prime with." Cheap ochre is nothing but clay stained, which makes a slippery, brittle paint.

4. Old Paint Loosely Attached To the Wood and Not Thoroughly Cleaned Away: If old paint is not firmly attached to the wood the contraction in the drying of the new paint will peel it off. Repeat before the old paint begins to let go. It's poor economy to delay repainting.

In case the under coat is brittle, scrape, sand-paper, and wire-brush all loose particles before repainting. If too far gone remove with a painter's torch. Always remember three thin coats of paint are better than two thick ones. The thick coats may

save a few dollars in the beginning but may cost more than double in the end.

5. Fat Resinous Wood Not Properly Seasoned Or Prepared For Painting. This is a recent trouble due to the scarcity of well-dried lumber. The chief trouble is with yellow pine, which is full of turpentine and rosin. It is the rosin that causes the trouble. It mixes with the paint and makes it brittle. The knots are the worst spots and should be coated with shellac before painting. Turpentine dissolves rosin. This fact suggests much turpentine and little oil in the priming coat, and perhaps more turpentine than usual in the second coat, but, when every care is taken, paint will sometimes peel on yellow pine, where it is no fault of the painter or the paint. Liberal use of turpentine and vigorous use of the brush to work the paint into the wood are necessary to success on yellow pine.

6. Boiled Oil. Never use boiled oil in the priming coat; even when it is genuine boiled linseed oil; its preparation gives a glossy, varnish-like surface, and the priming coat should always be flat, or the succeeding coat will not adhere to it. Boiled oil should never be used for any coat in outside painting.

Paint may fail from causes other than those named because of application on dirty or greasy surfaces; because of leaky roofs; because of the use of adulterated linseed oil and poor brushes; because the coats are too thick, or because the under-coats are not dry—but the majority of cases are covered by the causes specifically named in this article.

### BABIES GAIN BY THIS SIMPLE METHOD

Doctors say, souring waste in baby's digestive tract is usually back of any failure to gain weight according to schedule. And the best proof, this is true, is the quick way, weak, frail, puny babies improve when you cleanse their stomach and bowels and put them in order with a few doses of purely-vegetable, pleasant-tasting Fletcher's Castoria. This gentle, harmless preparation is the doctor's first thought to relieve those ills of babies and children, such as colic, gas, constipation, diarrhoea, colds, etc. Just be sure you get genuine Castoria in the bottle that bears the Fletcher's signature.

#### Home Decoration

Large patterned material should be chosen only for large rooms, and then sparingly, as one is apt to grow restless from seeing too much of it. This does not mean that large designs are bad, but that they require extreme care and skill in their selection, whereas a small pattern is usually safe.

We have observed that the value of anything depends a good deal on whether you are wanting to buy it or trying to sell it.

### Heart Trouble Hands and Feet Numb and Cold

Mrs. Wm. Fowler, Auburn, Ont., writes:—"Several years ago I was troubled with my heart and nerves, so bad, at times, my hands would become numb and cold. I took doctor's medicine, for a while, but it did me little or no good. I happened to see

advertised and started taking them at once, and continued for some time, and since then I have had no return of my trouble." Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

#### Rules For Fire Prevention

Do not permit rubbish, greasy rags, paper and useless waste to accumulate in or around buildings.

Do not allow matches kept in your homes, offices and stores in other than metal boxes. Use safety matches.

Do not allow children under ten years of age to use matches.

Do not use lamps and lamp burners that are not clean.

Do not tamper with or extend electric wire; employ an electrician.

Do not keep gasoline in other than air-tight cans painted red.

Do not fill tank of gasoline stove when lighted and fill by daylight only.

Do not permit a rubber tube connected to a gas stove.

Do not empty ashes in other than metal cans.

Do not carelessly throw cigar and cigarette stubs where they could cause a fire.

Do not fail to warn your children of the dangerous bonfires.

Loss through preventable fires in the United States is \$200,000,000, which, however, is exceeded by the annual loss through the lack of painting—according to Prof. H. H. King, who has conducted paint tests for several years for the people of Kansas, at the Kansas Agricultural College.

Clean-Up and Paint-Up campaigns reduce fire losses and insurance rates; increases property values; remove unsafe buildings; save the fly; make school and home gardens; make cleaner alleys and yards; educate children in fire prevention and clean-up measures; plant trees; collect and utilize waste; make more attractive and safer homes and places of business, and develops a community spirit that permanently insures a cleaner, safer, healthier and more beautiful town.

#### Don't Neglect Painting Up

Make the Paint Brush the Partner Of the Scrub Brush in Your Campaign Against Dirt

Paint-Up goes hand in hand with Clean-Up. When you have dusted and swept and mopped the corners and the open spaces, put the paint brush to work. It will be easy to keep things clean then. A painted surface does not accumulate dirt like an unpainted one does. Besides, dirt is more obvious on a painted surface, and less apt to be ignored. Paintlessness is the best incentive to cleanliness—which you know is "next to godliness."

Make the paint brush the partner of the scrubbing brush. They make a whole team. Enlist both of them for Clean-Up and Paint-Up.

It doesn't need much argument to convince a man that his house and his barn and his whole farm will be worth more money if the buildings are kept in the best order.

#### Don't Forget the Garden

You Can Make Enough Out Of the Back Yard To Paint Your House

Don't forget that garden this year. Gardens give thousands of dollars' worth of pleasure to the thousands of householders, they conserve and add to the food supply and give many persons a healthy and inexpensive form of outdoor exercise.

Cultivating the back yard regularly will save enough money to save the house for years, by painting it regularly. The work is congenial and creates contentment—and "garden sass."

#### Clean-Up and Paint-Up On the Farm

The man who owns a farm or lives on one should be just as much interested in Clean-Up and Paint-Up as the city householder. And the incentive to start such campaigns has been just as marked in the rural districts as in the more thickly populated ones.

Farmers everywhere are being urged to remove ramshackle buildings, repair and paint those that remain, trim hedges and trees, and clean and paint tools and machinery.

Hoisting of the Nationalist flag in Manchuria on December 31, placed the greater part of China under the Nationalist government.

Toothbrushes and handkerchiefs have again become the tokens of valor presented by Chinese generals to the troops under their command.

#### These All Count

Here are some pointers for citizens who would regenerate their community with a real Clean Up and Paint Up campaign:

1. Take away all the ashes and trash from your back yard immediately. Send your rubbish to the dumping ground.

2. Suggest to several men with teams, that they drive through the alleys with a sign, "Clean-Up Wagon" on their wagons; also a bell calling attention. People are only too glad to pay such a man for hauling their trash away.

3. Burn all rubbish that will burn. Clean your vacant lots and alleys ways.

4. Make your street and parking look as trim and well kept as possible.

5. Refrain from throwing old paper, banana and orange skins into the streets.

6. Plant some grass and flower seeds to make your home beautiful.

7. If your store front is dingy, paint it. Nothing will do more to improve the appearance of a town than the liberal use of paint.

8. If there are unnecessary, unsightly sheds in your back yards, tear them down. They detract from the beauty of your home and the town. Open spaces and fresh air are better.

9. If your walk is an eyesore to those travelling over it, repair it or build a new one.

10. Trim hedges and trees and spray trees.

11. Paint and whitewash barns, poultry houses, outbuildings, etc.

12. Paint tools and machinery.

The local "Clean Up and Paint Up" campaign offers the most direct and practical and permanent avenue through which women, organized or individual, can work for homes and home towns beautiful and sanitary.

#### Keeps Floors Beautiful

Beautiful floors are largely a matter of prevention—the great secret is to put them in perfect condition—and then keep them that way. Doorways, passages and tracks become worn and unsightly first. You can keep these spots looking well by waxing them frequently. This requires but little time and effort if a good prepared wax and floor polishing brush are used.

#### The Clean Town Is the Healthy Town

Germans Lurk in Filth and Clean-Up and Paint-Up Will Chase Them Away

It long has been a well known fact that dirt and disease walked hand in hand. Influenza, typhoid, pneumonia, tuberculosis, and other germ diseases exist because dirt exists. Get rid of dirt, and many diseases will be wiped out.

Cleanliness and the liberal use of the paint brush and mop and broom will make it hard for dirt to exist. If your town is spotless it will be a healthy town. And there is no better advertisement for a community than a low death rate.

Make your community clean and healthy. Wide-awake Canadian towns are conducting Clean-Up and Paint-Up campaigns, and Home and Community Beautiful campaigns as much for the sake of health as for the sake of beauty.

In Alameda, Cal., campaign workers went to the length of placarding houses with the inscriptions, "Clean," "Dirty" or "Filthy," as the case might be. It was heroic treatment but it proved effective.

Make your town a clean town and you will also make it a healthy one.

#### For Health's Sake

Clean - Up and Paint-Up—Guard Against Epidemics By Removing Their Cause

Tuberculosis and other germ diseases are generally brought about by dirt and filth. The germs of tuberculosis cannot live where there is sunlight, cleanliness, and fresh air. The scrubbing brush, soap and water, paint and whitewash are deadly enemies of tuberculosis. The easiest way to get rid of the germs that have nested in your house and around your premises is: Clean-Up and Paint-Up.

The cleaning out of filth will keep down influenza, infantile paralysis, typhoid, and diphtheria, as well as tuberculosis. And the painting brush should follow the scrubbing brush so that the cleaned places may be kept clean.

Do you want a clean town? Then do your part. Go through your house from cellar to roof and gather up all the old, useless, worn-out things stored away and get rid of them now. Clean out all rubbish, ashes, etc., in the cellars, yards, alleys, and alleyways.

Screen your homes thoroughly. Remove any animal or vegetable matter. Manure breeds flies, which carry disease to human beings, especially the babies. Clean out and fix up the manure bins. Repair your yard fences, poultry houses, out-houses, etc. Then paint or whitewash them. Don't spare the paint.

An ostrich's egg weighs three pounds.

### DIAMOND "A" HOUSE PAINT

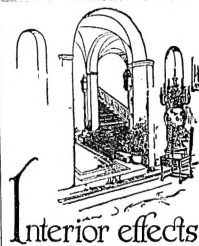

**MY FIRST CHOICE**  
because it's  
**Absolutely Pure -  
Covers More -  
Looks Better and  
LASTS LONGER**

**New-Minute Decorations**  
KYANIZE DECAL TRANSFERS, beautiful miniature oil paintings, called "Minute Decorations." Buy to enjoy—the artist's picture stamp. Wide variety of handsome designs—all colors. Add just the right finishing touch. No skill required. Groups of designs on a sheet—enough for several pieces of furniture.

50 Cents per Sheet.

Bring out the real beauty of your home with harmonious tones of Alabastine. Easier to apply than paint. Will not rub off. Use a soft bristle brush.

**CHURCH'S HOT & COLD WATER  
Alabastine**

### RICKETS

Children with weak bones or poor dentition receive great benefit from the use of

### Scott's Emulsion

It is wonderfully pure, vitamin-rich cod-liver oil and helps build a strong, healthy body, sound bones and teeth.

Scott & Borne, Toronto, Ont. 25-46

## BUDGET PASSED BY MAJORITY OF 24 VOTES

Ottawa.—The budget passed the House of Commons by a majority of 24 votes.

The final division, which resulted in the casting of 107 votes for the budget and 83 against, followed closely along party lines. All the Liberals, Liberal-Progressives, the two Independents, A. W. Neil, of Comox-Alberta, and Henri Bourassa, of L'Abbaye; H. B. Ashdend, Labor member for East Calgary, and L. H. Jelliff, U.F.A. member for Lethbridge, supported the government's motion.

In opposition were all the Conservatives, all members of the U.F.A. group with the exception of Mr. Jelliff, all the Progressive members and J. S. Woodsworth, Labor member for Winnipeg North Centre. A. A. Heaps, Labor member for Winnipeg North, was not in his seat when the final division took place.

The vote on the main budget motion eliminated the most colorful day which the House of Commons has seen so far this session. Two other divisions resulted in the defeat of the sub-amendment and amendment to the main motion, which had come from U.F.A. and Conservative ranks, respectively.

The U.F.A. sub-amendment, which in brief, asked the government to consider the British preference, was negated by the substantial majority of 136. Its support came only from members of the U.F.A. and Progressive groups and the two Labor members, Messrs. Woodsworth and Heaps. Against it were lined up Liberals, Liberal Progressives, Conservatives, the two Independents, Messrs. Neil and Bourassa, and H. B. Ashdend, Labor member for East Calgary.

The majority against the Conservative amendments was 62.

This amendment received its entire support from the Conservative Party. All other members in the House were opposed. The Conservative amendment, which was introduced by Hon. Hugh Guthrie, expressed regret that the budget made no provision "for reasonably safeguarding and protecting the interests of those engaged in agricultural pursuits or in industrial employment in Canada."

## Should Share Research Funds

Portion Should Go Toward Education Says Toronto School Board Member

Vancouver.—A portion of the funds available for research under the direction of the Dominion Government Research Commission should be set aside for investigation of educational methods, was the suggestion made by Mrs. H. Blumpe, member of the Toronto school board, speaking at a luncheon tendered by the Vancouver school board to school officials now here as delegates to the National Council of Education.

Much is said regarding the development of natural resources and the protection of these, but Mrs. Blumpe said the training of the Canadian children was equally important.

## Aviator Performs Dangerous Stunt

Makes First "Outside" Loop Ever Negotiated in Commercial Plane Minneapolis, Minn.—Charles W. (Speed) Holman, holder of the world's record of 1,433 consecutive loops, claims the distinction of having made the first "outside" loop ever negotiated in a commercial plane.

Holman performed the feat at an altitude of 4,000 feet over World Chamberlain Field here. He used the same Wright Whirlwind-motored bi-plane with which he won the New York-Seattle air derby two years ago.

The outside loop, regarded by aviators as one of the most dangerous "stunts" in flying, had never been completed before, except in strong, especially constructed army planes.

**Savings Deposits Less**  
Ottawa.—Savings deposits in Canadian banks decreased by more than \$7,000,000 during February, according to the monthly bank statement issued through the department of finance.

Railway locomotives now weigh as much as 230 tons.

W. N. U. 1731

## Long Term Leases For Churchill Lots

Will Probably Be For 99 Years Says Hon. D. G. McKenzie

Winnipeg.—Leases of lots in the townsite of Churchill, terminus of the Hudson Bay Railway, will probably be for 99 years, transferable and subject to revision as to rates at the end of five years, and each ten year period thereafter, it was stated by Hon. D. G. McKenzie, minister of mines and natural resources for Manitoba.

It was intimated a few days ago by Premier Bracken, that the government did not intend to sell lots at Churchill. Interest in the settlement of Manitoba's northern sea port continues to increase, Mr. McKenzie said. The government will concentrate its work on the townsites of Cranberry Portage and Sheritt-Gordon, the minister added.

## Will Join Los Angeles To London Flight

Australian Aviator Plans To Accompany Captain William Lancaster

Redbank, N.J.—Mrs. Keith Miller, Australian aviator, who flew with Captain William Lancaster from London to Australia, has said she would be second pilot and radio operator on a proposed flight from Los Angeles to New York, London and return.

Captain Lancaster will be pilot on the projected flight and Captain Harry Lyons will be navigator. Mrs. Miller said that she hopes to take off from Los Angeles in June. They plan to reach New York in one hop and fly between the east and west coast on their return without stopping. They will use a tri-motored all-metal closed plane.

**Questions Gun Boat On Lakes**

Ottawa.—Questions regarding the approach to the Canadian shore in one of the great lakes recently of a U.S. gunboat have been placed on the order paper of the House of Commons by Gen. A. E. Ross, Conservative, Kingston. General Ross requests information as to whether there is an agreement between the two countries for the use of gunboats on the great lakes and if Canada has any armed boats thereon.

**Former Doorn Official Arrested**

Berlin.—Police admitted that they had arrested Karl Hartung, recently secretary to the former Kaiser's wife, Hermine. The arrest had been kept secret. It was reported Hartung had threatened to make "revolutions" about conditions at Doorn Castle in Holland.

## SUNDAY SCHOOL LESSON

APRIL 21

COMFORT FOR GOD'S PEOPLE

Golden Text: "As one whom his mother comforteth, so will I comfort you."—Isaiah 66:13.

Lesson: Isaiah 40:1-11.

Devotional Reading: Psalm 30:1-5.

**Explanations and Comments**

"The People Of Judah Have Suffered of Their Evil Doings," verses 1, 2.—We pass today in thought from the time when Judah was enjoying great prosperity under good King Hezekiah (our text lesson), to the time when Jerusalem had fallen prey to the Babylonian power and had been laid waste, and the majority of the people carried away into exile in Babylonian.

Comfort ye, comfort ye my people, saith your God. How great was the people's need of comfort is shown in Isaiah 40:27, 49:14. Who the "ye" are problematical: "the prophets, or the prophetically-minded among the people; certainly not the priests." "The prophets may be nameless, but the Deity who speaks through them speaks as already known and acknowledged: 'My people, saith your God.' By these impersonal voices a personal revelation is made."

Speak ye comfortably to Jerusalem. Speak comfort to the heart of Jerusalem, is Dr. McFadyen's translation. The prophets were to put hope into the heart of the exiles, to strengthen them by an assurance of a speedy return to the home land, Jerusalem (then in ruins) is "an ideal representation of the people." "The city had suffered in and with her exiled people, and their perseverance was hers."—G. W. Wade. Tell her that her warfare is accomplished (her time of service, her exile, is over); that her iniquity, her guilt, is pardoned; that she has received double penalty (ample punishment) for her sins.

"The prophet's charge is laid upon all who would speak of Christ to men. Speak to the heart, not only to the head or the conscience, God speaks in the person of his ambassadors. The substance of the message may well find its way to the heart; for it is the assurance that the long, hard service of the term of exile is past, that the sin which brought it about is forgiven, and more wonderful and gracious still, that God's mercy reckons that the ill which followed have more than expiated it."—Alex. Maclaren.

## Tornado In Arkansas

Death and Destruction Follow In Wake Of Storm

Little Rock, Ark.—A tornado from out of the southwest swept through North Central Arkansas leaving a death toll of at least 20 persons, with indications it might mount considerably. A large number are injured and property damage is heavy. The storm apparently wrought greatest havoc near Swifton, north of Newport, where sixteen bodies had been recovered. Alicia, a few miles north of Swifton, also was reported to have had several deaths but telephone and telegraph lines were down, and the reports could not be verified.

At Swifton, the rapidity with which the death toll was increasing caused the prediction that it would reach 40 or 50 when all communities in that section had been heard from.

## New U.S. Ambassador To Great Britain

Appointment Of Former U.S. Vice-President Is Announced

Washington.—Formal announcement of the appointment of former Vice-President Dawes as ambassador to Great Britain has been made at the White House.

The appointment was made after receipt of word from the state department that the British government had advised that the appointment of Gen. Dawes would be entirely acceptable to the King.

## NEW RECORD IS SET IN C. N. R. REPORT FOR 1928

Ottawa.—The railway operating revenue of the Canadian National for the year 1928 reached the record figure of \$276,631,921. After payment of operating expenses, amounting to \$218,248,343, taxes amounting to approximately five million dollars and other charges, the total operating income was \$53,213,729 compared with \$40,789,724 in 1927.

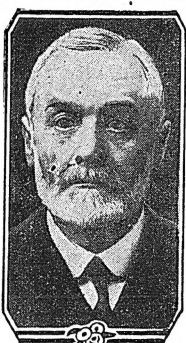

The report of Sir Henry Thornton, chairman and president, covering the operations of the system in 1928, was tabled in the House of Commons by Hon. Charles A. Dunning, minister of railways and canals. It tells of the progress made by the publicly owned system in its various departments.

The ratio of operating expenses to gross earnings in 1928 was 78.85 per cent, as against 81.75 per cent in the previous year.

The gross earnings exceeded those of 1927 by \$27,915,546, (11.2 per cent.) Freight traffic produced \$209,429,922; passenger traffic, \$34,187,022; express, \$13,307,373; mails \$2,099,212, while miscellaneous operations produced \$16,908,348. Passenger revenue increased 1.7 per cent, over the figure for 1927. Gross operating revenues were increased by \$695,947 (5 per cent.)

The total Dominion grain crop harvested in 1928 was approximately 1,200,000,000 bushels. The report estimates an increase of nearly 10 per cent, over the figure for 1927. For the calendar year grain deliveries on the western region of the C.N.R. were nearly 37 per cent, over the former record made in 1923.

## APPOINTED REAR-ADMIRAL

Admiral Sir Montague Browning, who has been appointed rear-admiral of the United Kingdom in succession to Sir Stanley Colville. Sir Montague Browning was with the grand fleet during most of the world war.

## More Settlers Going Into Peace River

Figures To Date Show Large Increase Over Last Year  
Edmonton.—Nearly 1,000 settlers with a total capital estimated at approximately \$1,150,000, have gone into the Peace River country as new settlers to date this year, according to colonization officers here.

The real rush of settlers commences in April. Last April 1, 200 settlers went in. This April conservative estimates place the figure at 1,500, and the good start already made this month indicates that this estimate is likely to be exceeded.

The settlers are in the majority of cases Canadian and American of excellent type, probably 90 per cent. of them are seeking homesteads.

The settlement in the Peace River lands beyond railway extensions both north and south of the Peace are favored, the homesteads being about equally divided between Fairview, on the north side of the river, and Hythe, on the Grand Prairie extension south of the river.

## Money For Immigration

Over Million Dollars Spent In British Isles In 1928

Ottawa.—A total sum of \$1,016,202 was expended by the department of immigration in the British Isles in 1928. The sum expended by the same department on the continent of Europe alone last year, was \$75,796.67. The amount expended for obtaining immigrants in the United States was \$392,157. The aggregate amount spent by the immigration department from 1881 to 1928 was \$81,618,024.96.

The information was given in the House of Commons by Hon. Robert Forke, minister of immigration and colonization.

## Income Tax Collections

Ottawa.—There was an increase of \$2,851,250 to the total income taxes collected in the year ending March 31 last, as compared with the year before. It was announced by Hon. W. D. Ehler, minister of national revenue, in a statement issued. The total for the past year was \$59,422,297.

## Starts Tenth Annual Tour

Tree-Planting Lecture Car Coming To Western Provinces

Ottawa.—Bound on a journey of eleven thousand miles, the tree-planting lecture car of the Canadian Forestry Association has left Ottawa and will spend the next six months in daily travels to Western communities. This is the tenth annual tour of the lecture car and to intensify the educational effect, talking pictures have been installed.

The lecture car is built with a sloping floor and with seats for 125 people. Electrical generators, radio and other machinery are able to project talking pictures at hundreds of points on the western railways where movies are seldom seen. The instruction given in the car is extended to groups of school children who frequently require six meetings daily to accommodate them. Last year the Canadian Forestry Association visited 200 prairie communities, giving instruction in the building of shelter belts and the beautification of farm homes.

## Leaves Estate To Medical Sergeant

Army Doctor Remembers Man He Met During War

Toronto.—A friendship established during the war between a medical sergeant and his superior officer, the "M.O." is recalled through the probate of the will of Dr. W. H. Scott, of Carrot Creek, Alta.

The will provides that P. W. Houghton, D.C., M.M., and bar, Legion of Honor, and former medical sergeant of the First Battalion, receive \$5,000 and a section of land at Carrot Creek.

Houghton met Dr. Scott during the war when the former was confined to hospital with wounds. He saw nothing more of the doctor until 1920, when they met in Galt, Ont.

## RUST RESISTING WHEAT SOON TO BE AVAILABLE

Winnipeg.—Efforts of agricultural scientists to develop a rust-resistant wheat, which would save millions of dollars annually, are meeting with success.

At a meeting here of the Associate Committee on Rust Research, organized under the auspices of the Dominion Department of Agriculture and the National Research Council, reports delivered showed that rust-resistant wheats which appear to have good baking and milling qualities have been secured through the efforts of the plant breeders engaged on the problem and now await development.

Paying tribute to the work of Canadian scientists, especially those working on agricultural problems, Dr. J. H. Grisdale, deputy minister of agriculture of the Dominion, said that profound study and unceasing application to the problems had at last produced results which seemed in a fair way to solve the difficulties in the way of combating the rust menace. This, he added, was obtained through the close co-operation of the plant pathologists and plant breeders.

During the sessions of the committee it was reported by L. H. Newman, Dominion cerealist, that baking tests on some 35 lines of Marquis Cross rust-resistant wheats are under way at Ottawa. Of these several showed real promise and some of them excel in baking qualities.

Members of the committee today witnessed a demonstration of a newly-developed rapid electrometric method for the determination of moisture in wheat. The demonstration was conducted by Professor Burton, of the University of Toronto, and Arnold Pitt, inventor of the instrument. The instrument is not yet fully developed, but gives great promise when complete details of its operation have been worked out.

Tests developed last summer in Manitoba showed that sulphur dusting of grain is effective in controlling rust, but further research work is necessary for the development of a dusting schedule. Small plot, field and greenhouse tests were conducted. Both hand-drawn and motor-driven machines were used.

At the concluding session of the conference, Dr. Grisdale announced that a conference of plant pathologists conducting research in plant diseases other than rust would be held in Edmonton some time during the autumn.

## TWO DEFENCES FOR SINKING OF THE "I'M ALONE"

Washington.—Two defences for sinking by coast guard vessels of the run runner "I'm Alone" are set up in a lengthy note prepared by state department officials in answer to the protest of the Canadian Government.

The draft of the note waits only approval of Secretary of State Stimson. It is understood that Mr. Stimson has examined the draft, but whether he made any changes is not known. The note is expected to go forward soon.

The note supports the coast guard in sinking of the "I'm Alone" in the Gulf of Mexico, with an exhaustive review of previous run treaty ship seizures.

It contends in the first place, it is understood, that three Canadian ships seized in recent years, the Vines, Gold Harbor and Pescawha, were hauled within the treaty limit, fled and were captured on the high seas. These seizures were approved by United States courts.

The note argues that the principle involved in these seizures is the same as that in the case of the "I'm Alone" and that Canada did not protest these incidents. The state department, it is understood interprets the failure to protest as a tacit admission that seizure on the high seas under such circumstances is a proper action.

The second defense involves interpretation of the run treaty between the United States and Canada. The treaty reaffirms existence of the three-mile international limit, but it expressly grants to the United States the right to stop, search, and if the search warrants, to seize liquor boats within an hour's steaming distance of the American shore. The note contends the treaty implied the right to employ necessary force in compelling liquor vessels to submit to being stopped, searched and seized by granting the right to stop, search, and seize.

## Must Comply With Law

Canadians Have To Pay Head Tax To Enter States

Washington.—The recent ruling of the Supreme Court withholding border-crossing privileges from foreign-born citizens of Canada is construed by immigration service officials to have also a considerable effect on native-born Canadians.

R. C. White, first assistant secretary of labor, said that while the court's ruling confirmed the admitted right of native-born Canadians to cross the international border at will, in so doing they would have to establish the status of immigrants under United States law.

"The chief effect of that will be to require Canada to pay the \$8.00 head tax as an immigrant and the \$10.00 consular visa fee," Mr. White explained. "The difficulties have been occasioned by the practice of Canadians resident along the border in obtaining employment in the United States and going to and from their foreign homes to work and back again. The native Canadian if he intends to continue such employment in the United States will have to pay the fees and undergo medical examination, but once that is done he will have a practically unlimited right to border-crossing."

## Toronto Student Wins Prize

Awarded Thousand Dollar Fellowship For Essay On Economic Problem

Montreal.—Miss Kathleen Best, of McMaster University, Toronto, won the \$1,000 prize offered by the Royal Bank of Canada for the best paper written by a student of any Canadian university on any one of certain specified economic problems. Miss Best took as her subject "Economic Aspects of the St. Lawrence Waterways Plan."

The prize is in the form of a \$1,000 fellowship to enable the winner to pursue her studies in any Canadian University she may select.

N. H. Pacey, University of Saskatchewan, was sixth.

**Thinks Pact Necessary**

Starnburg, Germany. Count Von Bernstorff, chairman of the German delegation to the League of Nations disarmament preparatory conference, on the eve of his departure for Geneva, expressed the opinion that the out-law war pact was necessary and should be followed by world disarmament and the adoption of a general pact for settling all disputes by legal means.

## YOUNG BRITISHERS FOR CANADA

Thirty young men, recruited from the industrial areas of Great Britain for the farming lands of Canada, on their way to Norval, Ont., where they will be given special farm training before assuming their roles as farmers. They were brought to Canada on the C.P.R. liner "Duchess of Richmond," under the auspices of the national headquarters of the Y.M.C.A. in England. The picture here shows a typical group on the train taking them to their new homes.

## The Lazy Age

Mechanical Perfection Taking the Place Of Manual Labor

One of our contemporaneous philosophers remarked the other day that no generation was ever so strong for suds without scrubbing, heat without stoking and success without thinking.

It is significant comment on the social economic and mental tendencies of the present day. At the rate at which we are moving today toward the perfection of the "push-the-button-for-what-ever-you want" principle of existence it seems possible that by day after tomorrow we may be getting everything for nothing. No fuss, no exertion, no required mental process—why does it deserve the name of thinking. The teleview device will probably be developed to the point of the perfect robot, and we may not even have to push a button to have all our needs efficiently served. Just a word or two in the right key will be enough to make the complicated marvel respond in the desired way. And, of course, as greater delicacy is attained in the mechanical nerve centres of the thing a mere whisper will probably be enough to do the work. The millennium, in physical millennium at least, will have arrived.

We have already achieved the suds without scrubbing, and the increasing popularity of heat without stoking has caused considerable alarm in the coal trade. Certain lines of advertising lead us to believe that success without thinking may be a fairly developed achievement in the not-distant future. Marked progress has already been made in that direction. It is at least possible today to purchase a considerable amount of our thinking ready-made. Why take the trouble to think when there is such a generous supply of expertly-cooked thought available in the open market?

There is a vast amount of encouragement for lazy adults in all this progress toward an easy-going life. The one question that bothers the citizen of a reflective turn of mind is: What under the sun shall we do to occupy ourselves when there is nothing left to do? There is no getting around that cosmic fact that humanity likes to be occupied in one way or another when it has no particular occupation. And what will be the nature of that success that is to be attainable without thinking?—Providence Journal.

## Good Advice About Shoes

Should Be Shined Before Being Worn Says One Who Knows

New shoes should be shined the first day they are worn in order to get the best wear out of them, according to a rather wise manager of a shoe shine stand. The reason, he said, is that most shoes are on the shelves a long time and the preserving oils are about dried out. "Many of my customers get a daily shine while others just drop in when they decide their shoes are shabby," he said. "Twice a week is ideal. Then, a customer should ask for a 'saddle soap' shine, which means a washing of the shoe and the saddle soap contains enough oil to prevent water doing harm to the leather."

## In Grandfather's Day

Our poor old grandpa never spoke through a telephone, never heard a gramophone record, derided Topsy's idea of aerial navies in the time, thought the world was created in six days, believed Mr. Darwin was an agent of the devil, and took his glass on occasion. But he raised a family of six, prospered in business, and had the respect of the community. Does anyone now do more?

## Contributed By West

Hogs to the value of \$200,000,000 or 10 per cent. of the Dominion's marketings in the year just closed were contributed by the swine industry of Western Canada, according to C. M. Learmonth, secretary of the Western Canada Livestock Union. Of the total hogs sold, 70 per cent. had been within the desired weight of 170 to 220 pounds.

"Yes, the police were very shrewd—only yesterday I had a midnight attack in broad daylight." Pages Gates, Yverdon.

W. N. C. 1781

## Sweet Clover As Prairie Crop

Likely To Prove Of Great Importance To The Farming Industry

The introduction of sweet clover into Western Canada as one of the main farm crops is likely to be of great importance to the farming industry. It is not only recognized as a useful crop for improving soils, but it also fits in well with the short rotations that are best suited to prairie agriculture. Sweet clover is not only an easy crop to establish, but the seed can be purchased so cheaply that no great expense is entailed in the sowing of a considerable acreage with this useful legume.

Sweet clover is an excellent forage crop. Experiments have been carried on at the Brandon Experimental Farm to find out how sweet clover ranks with corn when both are made into silage for milch cows. In his report for last year, published by the Department of Agriculture, at Ottawa, Superintendent Thilne tells of an experiment that was conducted with herds of milking cows during a period of nine weeks. The cows in Group 1 were fed corn silage during the first and third periods, and sweet clover in the second period. The cows in Group 2 were fed sweet clover during the first and third periods, and corn silage in the second period. The corn silage was of good quality made from North-western Dent corn that contained an average amount of cob. The sweet clover used in the silage was cut when about fifty per cent. of the plants were in flower. Records were kept of the yields of milk and the body weight gained by the cows when fed on the different rations. The corn silage proved slightly superior, yielding 1.3 pounds more milk per day than when the sweet clover silage was fed. The clover silage proved best for putting weight on the cows, which in this case were approaching the end of their milking period. Their average daily gain was slightly more than one-quarter of a pound more than those getting the corn silage.

## Expert Poultry Raiser

Michigan Man Has Installed Latest Scientific Brooder

Twenty-five years ago a modest school teacher of Romeo, Mich., the son of a chick raiser, brought out his first batch of chicks, with 52 of them just scratching. A year later he sold a cow and with the money entered the first poultry short course offered at State College, then Michigan Agricultural College, at East Lansing.

Today W. A. Downs has his 1929 hatch under way, which will include more than 250,000 chicks. He intends raising a part of them to three or four weeks old in a new scientific brooder which he has installed—the only one of its type in Michigan.

Downs has spent his life and his research in the raising of chicks, and says, "It just comes natural. My father was a poultry man, starting 40 years ago, and I have carried on his work."

Downs' new brooder, with a capacity of 16,900, is equipped with ventilation chambers and heating apparatus worthy of the most complete hospital or health center. In it the chicks are raised for the first three or four weeks under the best possible conditions, in order that they can be of high efficiency later.

## According To His Idea

Three men were discussing the merits of the world's greatest inventors. One spoke loudly in praise of Morse, while the other two favored Edison and Marconi.

An old gentleman sitting close by ventured the following remark: "Well, gentlemen, if you'll excuse me interfering, I might tell you that the fellow you invented interest was no fool."

## Makes Notable Flight

When "Punch" Dickens, Edmonton editor, brought his monoplane to a landing on the Edmonton flying field the other evening, he completed a notable flight of 1,600 miles from Fort Good Hope on the rim of the Arctic circle. The plane carried a valuable consignment of furs from the northern ports.

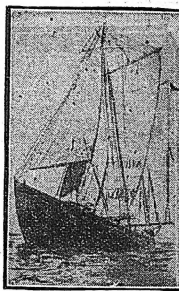

## Taking To Automobiles

The Fiji Islanders are forsaking their spears and war-clubs for automobiles, of which they have nearly 1,100 according to the Commerce Department. Automobile registrations in this far-off island have increased from 100 in 1918 to 1,074 at the end of 1928.

## Scotch In The Lead

Scotsmen are certainly developing politically. Of the Old Countrymen in the Commons there are 11 from Scotland, 10 from England, 4 who claim Ireland as the place of their birth, and 1 Welshman.

## ACTION PROTESTED

The Canadian schooner "Im Alone," the sinking of which by United States coastguards off the Louisiana coast in the Mexican Gulf, is causing a dispute as to whether the action of the coastguards was justified. The skipper Capt. Randall, a Nova Scotian, states he was sunk off the American coast outside the 12 mile circuit and in international waters. The ship is reported to be of Canadian registry.

## Fish Fry Go Free To Quebec Waters

National Railways Helps Conserve Game Fish

To assist in the conservation of game fish in the waters of the Province of Quebec, an arrangement has been reached between the Canadian National Railways and Mr. L. A. Richards, Deputy Minister of Mines and Fisheries, whereby the Canadian National Railways will handle gratis shipments of fish fry from the Provincial Government Hatcheries to points on the system within the province.

At the present time, four hatcheries are operated by the provincial government; at St. Alexis, Des Moines, Lac Tremblant, Gaspé and Baldwin Hills. Efforts toward the conservation of speckled trout and salmon trout will be the principal care of these hatcheries at present, later it is anticipated that other game fish will be included and an energetic campaign of restocking waters at the various points along the Canadian National lines in the Province of Quebec will be carried on. In the past, game fish fry have been handled on a similar basis from the federal government of the province of Ontario hatcheries and the new arrangement brings into line also the product of the hatcheries operated by the province of Quebec.

## Most Absent-Minded

"Where's the car, dad?" asked the son of an absent-minded professor. "Why, dear me," he said. "I really don't know. Did I take it out?"

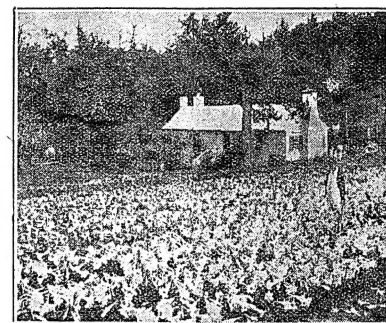

"You certainly did. You drove it into the town."

"That's very remarkable," replied the professor. "I remember now that after I got out I turned round to thank a gentleman who had given me a lift and wondered where he had gone!"

## Most Valuable Oil Wells

"Turner Valley has produced in Home No. 1 and Royalty No. 4 the two most valuable wells in the British Empire," said Stanley Davis, formerly petroleum engineer for the Dominion Government. "Royalty No. 4 has produced over \$1,000,000 a year for 4½ years, and Home No. 1 has started off with a larger production than Royalty No. 4."

## EASTER LILIES IN BERMUDA

Bermuda, where the Easter lilies come from, is on the route of the Canadian National Steamships West Indies Service, which was inaugurated in December. The new steamers give a fortnightly passenger, cargo and mail service between Canadian Atlantic ports and the picturesque ports of the Spanish Main. The first vessel of the new fleet, which when in full operation, will consist of five vessels, was christened "Lady Nelson." The others are also named after the wives of famous British seamen—Canadian National Railways Photograph.

## Aged Told By Rings

Study Of Life History Of Halibut Is Most Interesting

The age of the halibut, one of British Columbia's most important food fish, is determined in much the same manner as the age of trees—by the rings. But instead of cutting the entire fish to ascertain the number of rings in a cross section of its body it is necessary merely to test a stone found in the ears of the halibut, according to J. P. Babcock, chairman of the International Fisheries Commission, and a well-known authority on the habits of the halibut.

Mr. Babcock says that during the past few years the commission has collected many specimens of halibut, larvae much smaller and younger than any previously known and that it has been possible through these discoveries to study the life history of the halibut much more thoroughly than ever before.

"How long the young fish swim upright and when and what changes before the halibut acquires the habit of lying on one side, with its head twisted sideways, both eyes on the upper side, is unknown," says Mr. Babcock. "It is one of the most fascinating problems on which the commission is engaged. It is one of the most engaging problems in marine biology."

"Recent years there has been no branch of fishery science as rich in results as that of the study of age and rate of growth. In the case of salmon we may determine the life by checking up on the length of time spent in fresh water, the time in the sea and the river in which it is hatched. But this is the way we determine the life of the halibut. The halibut has an inner ear but no external ear. In the ear a stone is developed which grows in size from year to year by deposits from the outside. The winter growth is more transparent than the summer growth, making a stone which, it is marked like the rings of the tree. The bones are called otoliths, or ear bone and these are used to determine age."

"The scales of the halibut also show growth rings, but they are so constructed as to make it more tedious to determine than the study of ear bones. Halibut mature in their eleventh year and we have records of halibut living until forty years of age. The growth of the halibut is slow, but they ultimately grow to great size. Females sometimes reach 400 pounds. Males do not attain more than 100 pounds in weight even at the age of thirty-five years."

## Would Be Hard Job

Aviators who have hand bills to deliver in Harrisburg, Pennsylvania, must put them under the doors of the houses. How they are to accomplish this does not matter to Chief of Police Thompson. A barrage of yellow circulars dropped over the city by an aeroplane aroused the chief's ire, and he dug up an old ordinance which requires hand bills to be placed under doors to prevent them blowing on the streets.

## The Backward Trend

Her Father: "But, my boy, you are to young to marry my daughter. You are but twenty-one and she is twenty-seven."

## Suitor: "But, Sir—"

"No, at present the disparity is too great. Better wait half a dozen years. Then you'll be twenty-seven and she'll probably be about the same age."

Toll rates through the Panama Canal approximate \$1,000 an hour.

## Yukon Man Makes Heads Of Prehistoric Ivory

Ivory From Mastodons, Fifty Thousand Years Old Converted To Use

On one of the steamers which ply on the glamorous Yukon River, between Whitehorse and Dawson, there is an engineer named Jack Elliott. The North is full of stories, but there are few more interesting than the story of Jack Elliott. It is not one of the yarns of a man who lost a claim that brought fortune to another; it is not the tale of an accident that unearthed treasures too great for the strength of man; it is not the romance of a heavy poke of gold dust lost on one throw of the dice; it has nothing to do with gold at all. Jack Elliott did not travel the Trail of '98. He went to the Yukon when the first flush of the fever had passed.

He found another treasure. His is the story of ivory. It begins in the days, so dim that men can never quite comprehend them, when the gigantic shaggy mastodons lumbered over the earth and gored each other with appalling tusks. The monsters perished. Merely time crushed them and buried them deep. When man's quest for gold in the Yukon turned from an adventure into an industry, man dug them up again. Colossal skeletons fifty thousand years old, Elliott brought some of the tusks back to Whitehorse with him from one of his trips; great smooth masses of ivory, as thick as the trunks of small trees. He contrived and built with his own hands machines for the cutting and polishing of the ancient ivory into beads and other knickknacks. In the summer months, he travels up and down the Yukon, and he collects his ivory. In the winter, when the river is frozen and passengers and freight between Whitehorse and Dawson are carried in trains of automobile tractors, he works at his ivory. It is a new romance of the Klondike and one that has caught the imagination of every tourist who leaves the Canadian National steamer at Skagway and pushes on to Whitehorse by the little narrow gauge railway that follows the trail of the gold-seekers through the famous White Pass.

## Sugar Syrup For Bees

New Postal Regulations To Encourage Bee Keeping Industry

In order to encourage the beekeeping industry in Canada the Canadian postal regulations are being amended to permit of packages of honey bees being sent by mail when fed on sugar syrup as allowed by the United States Post Office. Hitherto the post office regulations in Canada debarred the use of a certain candy compound as food supply for bees, which it has been found is not as satisfactory for bees as sugar syrup.

The action of the Canadian Post Office Department in changing the regulations came as a result of representations made by the Manitoba Beekeepers' Association. Beekeeping is becoming an important industry in Manitoba. Of the 19,989,909 pounds of honey produced in Canada in 1928, the province of Manitoba accounted for 5,774,398 pounds. It is the second largest producer among the provinces of the Dominion, being exceeded only by Ontario with 8,500,000 pounds. Quebec is in third place with 3,800,000 pounds. In 1920 the total honey production in Manitoba was only about 120,000 pounds.

Thousands of packages of bees are annually imported into Western Canada every spring principally from Alabama and other Southern States.

## Dynamite For Museum

Henry Ford's Edison memorial museum, built as a tribute to the motor magnate's close friend, Thomas A. Edison, will contain the world's first practical commercial light and power system, which lighted several homes in Sunbury, Pa., years ago. The old Sunbury dynamite and engine still are in New York, but will be moved to Ford's museum at Menlo Park, N.J., according to F. A. Wardlaw, curator of the Edison historical collection.

## His Mistake

Curtis: "How many cases did you try yesterday, Judge?" Judge: "Only one. It lasted all afternoon."

Curtis: "Important, I suppose." Judge: "No. It was a woman arrested for speeding and I was fool enough to ask her what she had to say for herself!"

"One woman," remarked the mere man, "is just as good as another—there's no difference in the matter." "And one man," rejoined the widow, "is just as bad as another—if not worse."

## The Hudson Bay Region

Valuable Pamphlet Deals With Important Developments In Northern Area

Current undertakings instituted by the Canadian Government for the speedy completion of the Hudson Bay section of the Canadian National Railways and the selection of Churchill instead of Port Nelson as a terminal seaport have raised public interest in the Hudson Bay region. Physically and historically this region is of outstanding interest in Canadian development. To meet the demand for authentic and up-to-date information respecting it, the Natural Resources Intelligence Service of the Department of the Interior has issued a 50-page pamphlet entitled "The Hudson Bay Region."

The subject matter is treated under four headings—general description, natural resources, mining development and transportation. The physical features are briefly described, incidentally pointing out that the Hudson Bay route penetrates deeper into the interior of Canada than does the St. Lawrence system of waterways. An historical sketch reminds the reader that this northern part of Canada has had a longer tenure under one flag than any other extensive part of the North American continent. Climate and precipitation are also dealt with.

A gist of the known data respecting natural resources is contained under the various sub-headings of lands, forests, minerals, water-powers, fur and game, and fisheries. The section under transportation deals with the building of the Hudson Bay Railway, the advantages of Churchill Harbor, the investigations being made respecting ice conditions in Hudson Strait, and the construction of branch lines made necessary by mining developments.

There is a selected reading list appended for the benefit of those who wish to pursue the subject further. The text is illustrated by three full-page maps and nineteen half-tones embracing a wide range of typical views. The typographical work is especially well executed.

Copies of this timely pamphlet may be obtained free on application to the Director, Natural Resources Intelligence Service, Department of the Interior, Ottawa.

## Rescued In Mid Ocean

Dutch Seaman Attempted To Cross Atlantic In Lifeline

Captain Johannes J. Schuttevaer, 73-year-old Dutch seaman, his first mate, Francis Meyer, and his second mate, Cornelius A. Vanderhaar, arrived at New York from San Juan, Porto Rico, on the steamer San Lorenzo with the 20-foot lifeline in which they set out from Lisbon to cross the Atlantic February 8.

In reality, more than a year has elapsed since they began their journey from Rotterdam to New York. They were nearly shipwrecked in the Bay of Biscay in February, 1928.

They repaired their boat in Lisbon and finally set out across the Atlantic early in February of this year. On March 18 they were picked up in mid-ocean, half-starved and without drinking water, by the Spanish mail liner Marques de Comillas.

## Apology Accepted

During a discussion at a meeting of the Association of Assistant Mistresses in London, a member told a story of two boys who were heard making friends after a quarrel. One boy said, "Of course, Charlie, when I called you a liar and a coward, I did not mean it as an insult, only as a statement of fact. The second boy replied: "Well, if that was all, it does not matter."

## Hatching Eggs Go To China

Ninety dozen special breeding hens eggs are in the hold of the S.S. "Empress of France," bound for China. The consignment is being handled by the Canadian Pacific Express Company. The eggs are from the best breed of Leghorns and are all hand-picked and electrically examined.

"She lives in Redmayne Street. I don't believe the number, but you can easily find the house—it is the one without a wireless pole."—Faun, Vienna.

## NICE WORDS WON'T DYE a dress or coat...

Neither pretty pictures nor colorful adjectives will dye a dress or coat. It takes real dyes to do the work; dyes made from true anilines.

Next time you have dyeing to do, try Diamond Dyes. See how easy it is to use them. Then compare the results. Your dealer will refund your money if you don't agree they are better dyes.

You get none of that re-dyed look from Diamond Dyes; no streaking or spotting. Just fresh, crisp, bright new color. And watch the way they keep their brilliance through wear and washing. They are better dyes because they contain plenty of real anilines—from three to five times more than other dyes. But you pay no more for them than for ordinary dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. Remember this: when you buy the blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Toronto, Ont.

### CHAPTER XVII.—Continued

Connie made no attempt to check her cynos's onward flight. She was in no mood to listen to the kudos of the admiring crowd; she wanted only to get away from the scene as quickly as possible. The movement toward the centre gave her the opportunity she desired, and she urged the weary cayuse through an opening on her left. Many hands were reached up to congratulate her, but she pushed her way through to the trail.

At the sound of hoof-beats behind her she turned to see Lafonte urging his tired mount toward the Pemberton trail and looking back apprehensively over his shoulder.

Several men were running after him, shaking their fists and uttering loud imprecations. A man leaped from behind a jack-pine to land in the path of the half-breed, lunged for the reins, missed, then caught the stirrup. Lafonte struck the man a blow with his heavy whip that loosened his hold and felled him to the ground.

Connie saw Gillis break from the crowd, jump to the saddle of a cay, and start after the fleeing man just as the latter disappeared in the

woods. Gillis waved his hand to her and vanished in pursuit. She urged Pegasus to the shelter of the timber as she saw her father and Donald running toward her.

The strenuous race and the spectacular fall had left both horse and rider in a badly shaken condition. Connie's body was bruised and sore, and her head ached horribly. The cayuse's strained muscles were stiffening, he was limping badly, and his head drooped wearily as he dragged his tired limbs up the steep trail.

At the barn door Connie dismounted stiffly, removed the horse's bridle, then threw her arms passionately around his neck and stroked his symmetrical head with soft caresses. "I'm so sorry, Peggy darling," she said in a choking voice.

The horse nipped her shoulder in a weak attempt at playfulness, as if to signify that he quite understood.

Connie's eyes brightened at a sudden thought. "Peggy, dear," she whispered softly as she nestled her cheek against his soft mane "do you know that I can have some nice clothes now? Lots and lots of nice things. I am going to buy you a blanket—a nice thick one for winter—and some ribbons for your mane. And you, Peggy—with a flood of tenderness in her voice—"you won all this for me."

She was crooning sweet nothings in his ear that only Pegasus could understand when her father appeared, breathless from running, his face gray and anxious.

"Are you all right, Constance darling?"

Connie stepped forward. She was pale and weak, but her colourless lips tried to form a smile. "Yes, Daddy dear—I'm all right." Her voice trailed to a whisper and the blue eyes closed as darkness fell upon her like a cloud. Swinging uncertainly for an instant, she fell like a broken flower into her father's outstretched arms. For the first time in her life Connie had fainted. She lay like a child in his trembling arms, her upturned face wearing the pallor of death.

With a prayer on his lips and an agony of fear in his heart, her father carried her to the cabin and tenderly stretched the bruised little body on the coarse blankets of her bunk.

### CHAPTER XVIII.

At the race-course the crowd eddied excitedly about the judges' stand, or stood in groups talking of the wonderful performance of the spotted cayuse that had made the erstwhile champion appear a mere tyro.

Gillis came riding slowly from the woods and was hailed by questioning shouts from a score of throats.

"Did you get him?"

A bloody handkerchief was wrapped around the big man's head, and a livid welt showed on his forehead. He smiled grimly as he dismounted. "I got the d—d skunk," he answered savagely.

He turned to a group of Indians. "You fellows'd better look out for him when you go along; his eye-sight's kinda bad."

Donald came to the front of the judges' stand and held up his hand for silence. Gradually the hum of voices died away and the crowd turned to face him.

"As you know we are to take up a collection to add to the Company's purse. The gentleman below," pointing down at Andy, "will hold the hat. We have witnessed an exhibition of matchless skill and pluck. Give us your feel."

The crowd cheered lustily. Then, jostling each other good-naturedly like a lot of schoolboys, they formed in a long queue.

Andy started the contribution by giving his whole roll of bills. Money showered upon him until he was forced to call for another hat. "Fightin'!" Jack came to Donald in great perturbation. "Say! Our gang's all story broke. Can we sign a due-bill?"

Donald called the time-keeper. "Make her out for twenty bucks for each of us," said "Fightin'!" Jack. Andy's spirits soared as the pile rose higher.

"God bless 'er little 'eart," he murmured, "she can 'ave an 'ole shipload of them blinkin' camello skins, things."

An hour later, as Donald climbed the hill to deliver the prize, he met Doctor Paul.

"How is she, Doctor?"

"She's had a pretty shaking up, but there are no bones broken. She will have to remain in bed for a week or so."

Wainwright saw Donald coming and stepped outside the door to meet him. "She's sleeping," he said in a low tone. He looked questioningly at Donald as the latter passed him the package of money.

"The prize money," Donald explained.

Wainwright peeped at the contents and his face lit up with pleased astonishment. "I understood that the purse was to be a small one!"

When Donald told him of the collection Wainwright's face flushed hotly. "Is that the custom?" he questioned sharply.

Donald nodded.

Wainwright paced nervously with hands clasped behind his back. "Pardon my abrupt manner," he said contritely. "I am a bit out of sorts to-day."

Every evening Donald called at the Wainwright home bringing little delicacies carefully prepared by Andy. Once he spoke to Connie from outside the door, and her answering voice gave him an odd thrill. He pondered over this as he made his way down the hill. He was struck by a sudden thought. His face broke into a smile and he shrugged his shoulders. "Nonsense," he said aloud.

Janet remained several days after he returned to the city. She tried in vain to restore the familiar relations which formerly existed between herself and Donald. His evening visits to the cabin on the mountain deprived her of his company, and she, half-jealously, reproved him for his inattention to her. With spirits depressed and a despondent look in her dark eyes, Janet returned to Vancouver.

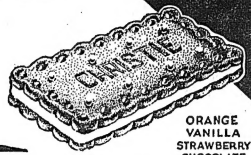

One evening Wainwright gave Donald a letter, to post, addressed to a big departmental store in Vancouver. A few days later there arrived numerous bundles and boxes, including a big trunk. Donald with the assistance of Gillis's crew carried them up the hill.

## Christie's ASSORTED SANDWICH

In the store or on the 'phone, always ask for

**Christie's Biscuits**  
The Standard of Quality Since 1853

Deliciously flavored,  
velvet-smooth cream  
fillings between two  
crisp, crunchy biscuits.

ORANGE

CHOCOLATE

## Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antidote for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes. Don't depend on crude medicines. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

### Long Air Trip Planned

One of the longest air lines in the world is being contemplated between London and Cape Town. The route, more than 8,000 miles long, will branch off at Cairo, crossing over into India.

Vinegar used in place of water when mixing plaster of paris will keep the plaster softer for a longer time than water.

### Little Helps For This Week

"Which hope we have as an anchor of the soul, both sure and steadfast."—Hebrews vi. 19.

God liveth ever! Wherefore, Soul, despair thou never! What thou shalt tread with bleeding feet.

A thorny path of grief and gloom, Thy God will choose the way most

To lead thee heavenwards, lead these home,

For this life's long night of sadness He will give thee peace and gladness;

Soul, remember in thy pains, God o'er all for ever reigns.—Zihl.

Who can really think and not think hopefully? You were in my mind last night, and you brought a little boat to sail me past despondency of life and fear of extinction. When we despair and discolor things, it is our senses in revolt, and they have made the sovereign brain their drudge. I heard you whisper, "There is nothing the body suffers that the soul may not profit by." With that I sail into the immortal; it is my promise of the immortal,—trenches me to see immortality for us.

—George Meredith.

Commissioner For Panama  
A Canadian trade commissioner's office has been opened in Panama, and a trade commissioner will shortly be appointed it is officially announced. At present most of the Central American Republics come under the commissioner's office in Mexico, while Venezuela and Colombia come under Cuba.

A magazine writer says a dog finds an empty place in man's life. This is especially true of the hot dog.

Minard's Liniment for the Grippe and Flu.

The Government of Alberta will spend \$1,000,000 on improving and constructing roads in the province this year.

You can tell a civilized country. It's one where people kill the birds and then spend millions to fight insects.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Magistrate: Are you sure you understand the nature of an oath?  
Youth (scared stiff): Sure. Ain't I your caddy down at the links.

Minard's Liniment for Coughs and Colds.

He (earnestly): "I mean to kiss you, and kiss you, and kiss you."

She: "That would be only three times."

Minard's Liniment prevents Flu.

## "FEEL WELL AND STRONG"

MISS J. MALIN  
R.R. No. 5, Barton St. East, Hamilton, Ont.  
"I have to work in the store and do my own housework and I got nervous and run-down and was in bed nearly all summer. The least noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound and I have taken seven bottles. It has made me stronger and put more color into my face. I get along nicely now with my work and with my four children. I would like to answer letters."—Mrs. J. Malin.

MRS. FRANK LUKES  
R. No. 1, Box 58, Lankin, N. Dakota  
"I had two babies which I lost at seven months. Before my third baby was born my husband advised me to take your medicine and he bought me three bottles of it. When I had taken the first one I began to feel better so I kept on during the whole period. We have a healthy baby boy and we are so proud of him and praise Lydia E. Pinkham's Vegetable Compound for the help it gave me. I feel well and strong."—Mrs. Frank Lukes.

## Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Medicine Co., Lynn, Mass. U. S. A. and Cobourg, Ontario, Canada.

The above lands will be offered subject to reserve bid, and the reservations contained in the existing certificates of title, and reserving thereout all mines and minerals, and redemption may be effected by payment of the full amount of arrears at any time prior to sale. Terms will be announced at the sale, or may be obtained from the undersigned.

Dated at Edmonton, this 6th day of March, A.D. 1929.

W. D. SPENCE,  
Deputy Minister of Municipal Affairs.

C. V. Johnson, who recently returned from Sweden, where he visited his parents and relatives, visited at the home of his daughter, Mrs. A. V. Brodine on Wednesday.

Leslie Bell, of Rearville district, met with an accident on Monday while driving a grain truck. He was taken to the Hanna Hospital and we understand he is progressing favorably.

Alex. R. McTavish, R.O., sight specialist, will make his regular monthly visit to the Chinook Hotel, Tues., April 23rd. Dependable eyesight service. Eyes tested, glasses fitted. Prices reasonable.

This past week D. E. Holloway, local field supervisor of the Land Settlement Board placed another Ministry of labor trainee, Cecil Bevan, with O. Began, south of Chinook.

Mrs. Amy Mayrs was a visitor to Youngstown on Sunday where she spent a most enjoyable afternoon renewing old acquaintance. On Tuesday afternoon she left to keep house for Mr. H. D. Connor.

H. Eckardt has received a shipment of international Oil burners which can be seen at Clarence Peterson's. They are wonderful labour savers and guaranteed to heat the cook stove or range.

Sale price \$21.00 each, the same price as they are sold in the U. S. A. Harry Lloyd local agent.

## Sounding Creek Council

Council meeting of the Municipal District of Sounding Creek No. 273 was held on April 15th, 1929. Councillors Cameron, Connolly, Lawrence, Armstrong, Synnuck and Thomas present. The minutes of the previous meeting were read and adopted, on motion of Mr. Lawrence.

Moved by Mr. Synnuck that we make a grant of \$25.00 to the Canadian Red Cross Society.

Moved by Mr. Armstrong that we accept the tender of Bert Mays to paint the baseboards and west end of the office and the east end of the coal shed with two coats and furnish the paint for \$21.00. Moved by Mr. Lawrence that we pay the Estate of J. K. Yeats the sum of \$24.90 for the 83 acres of land used for a road diversion on the S. W. 1/4 of Sec. 17 29-7-4. Moved by Mr. Synnuck that we rent the N. E. 1/4 of Sec. 7-30-9-4 to P. A. Davis for one year at a cash rental of \$27.50.

Moved by Mr. Lawrence that we pay A. C. Anderson the sum of \$50.00 for the keep of Don Curtis for the months of Feb. and March.

Moved by Mr. Cowin that the taxes on the Municipal Lands to which Title has been fully acquired be transferred to a Tax Forfeited register.

Moved by Mr. Cameron that the Secretary be appointed Assessor for the various parcels of land which has come under taxation through sale of school lands.

Moved by Mr. Lawrence that we purchase one Adams Engine Hitch and one 8 foot blade for our Adams Grader.

Moved by Mr. Lawrence that we make a grant of \$100.00 to the Salvation Army.

Moved by Mr. Cameron that in order to meet the demands of the School districts that the following rates be struck.

Annie 20 Mills, Chesterfield 7, Crystal, 15, Dee Jay 15, Devonshire 16 Diamond 14, Earl Grey 10 Glenaville 8, Helen 4, Hollywood 15, Little Gem 13, Marby 11, Marguerite 16, New Bliss 10, Ryerson 5, Wastina 6, Young Canada 12.

Moved by Mr. Cowin that the

lease to George Worthing be extended for one year.

Bills totalling \$215.95 were ordered to be paid, after which the meeting adjourned to meet again on Saturday the 25th of May at 2 p.m.

## Trustees Meet

(Continued from page 1)

of Mr. Jas. L. Carter as trustee of Bison. S. D. Mr. Rosennu moved that this resignation be accepted and that the Secretary be instructed to take steps for calling a meeting for election of some one to fill this vacancy.

Following is the schedules of van-drivers for the various routes: Route 2—Alfred Horman, Mar. 13-Mar. 28; Lorne Proudfoot, Apr. 8-May 17, Klaas Hohn, May 20-June 30.

Route 3—H. G. Becker, Mar. 4-28; Route 5—Tobias Schmidt, Jan. 7-25; H. Dick, Jan. 28-Mar. 12; Tobias Schmidt, Mar. 13-Mar. 28; Route 6—R. W. Wright, Jan. 7-Feb. 1; H. Jensen, Feb. 4-Feb. 23; R. W. Wright, Feb. 25-Mar. 1; R. V. Lawrence, Mar. 4-Mar. 28; Route 7—J. Post, Jan. 7-Feb. 4; Joo, Schmidt, Feb. 5-Feb. 12; H. O. Hille, Feb. 13-Mar. 28.

On motion the rate of pay was set at \$4.50 per day from Jan. 4-Mar. 22, \$5.00 from Mar. 25 for Route 3, and \$5.00 per day from April 8 for Routes 6 and 7. The Board then adjourned on motion of McDonald.

## NOTICE

For: OTTO FENSKE, Chinook, Alberta.

TAKE NOTICE that in the Supreme Court of Alberta, Judicial District of Calgary an Order nisi has been granted on March 1st, 1929, by the Masters in Chambers at Calgary in action No. 29618 commenced by Netherlands Investment Company of Canada, Limited against Emma Lodge Moore as Mortgagee to recover \$1,885.71 and for sale and/or foreclosure in respect of a certain mortgage dated 22nd day of March, 1917, covering the W. 1/2 of Sec. 31-25-8-W. of the 4th Mer, Alberta.

AND FURTHER TAKE NOTICE that after the first day of December, 1929 a motion may be made; to offer the said property for sale, or for foreclosure; unless before that date you as second mortgagee exercise your right to redeem or take other steps in Court to protect your mortgage security. (Hugli & O'Keefe, Plaintiff's Solicitors.)

DATED at the Court House, Calgary, Alberta, on the 23rd day of March, 1929. "C. H. SMITH" Clerk in Chambers

Approved: "L. F. CLARRY" M.C.

## MOTOR TRUCK DELIVERY

Prompt Service and prices reasonable

M. L. CHAPMAN  
Chinook, Alta.

UNDER and by the virtues of the Powers of Sale provided by the Land Titles Act, under a certain mortgage which will be produced at time of sale. There will be offered for sale by public auction at the Acadia Hotel, in the Village of Chinook in the Province of Alberta, on Saturday the 20th day of April 1929, at the hour of 2 o'clock in the afternoon, the following property, namely: The south half of section twenty-one (21), in township twenty-eight (28), range seven (7) west of the 4th meridian excepting thereout and therefrom all mines and minerals and the right to work the same.

Terms of the sale to be 20 per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all incumbrances, save crop share lease

expiring the 31st day of December A.D. 1929, and taxes for the current year.

The vendor is informed that the above property is situate five miles from Chinook and that 25.5 acres have been cultivated. 25.5 is clay loam, and there are two miles of two-wire fence. There are no buildings on the property. For further particulars and conditions of sale, apply to
